Premium Soldering station

Ref. DIT-D

Packing List

The following items should be included:

DI Control Unit1 unit
Ref. DI-1D (120V)
DI-2D (230V)
DI-9D (100V)

Stand1 unit
Ref. AD-SD

Soft Thermal Insulator Handle 1 unit
Ref. T245-C

Tip Cleaner1 unit
Ref. CL9885

Sponge1 unit
Ref. S0354

Cartridge1 unit
Ref. C245903

Stand cable 1 unit
Ref. 0011283

Power Cord1 unit
Ref. 0009417 (100V/120V)
0009401 (230V)

Manual1 unit
Ref. 0014651

Features

USB Connector

Download the latest software from our website to improve your soldering station.

JBC Updater
www.jbctools.com/software.html

Update the station software via USB connection:

JBC Manager
www.jbctools.com/manager.html

Manage and monitor as many stations as your PC can handle by using the JBC Manager. You can export data to another PC.

Adjustable Stand

Tip Cleaner

Improve thermal transfer by cleaning the tip after each solder joint.

Brass wool
Ref. CL6210

Very effective cleaning method. It leaves a small layer of solder on the tip to prevent oxidation between cleaning and rewetting.

Sponge
Ref. S0354

The least harmful cleaning method. Keep the sponge damp with distilled water when working to avoid tip wear.

Splashguard

It prevents splashing of solder particles when using the brass wool.

Non-slip base

No need to hold the base while cleaning tips.

Wiper
Ref. CL0236

A temperature resistant receptacle lets the operator remove excess solder by gentle tapping or wiping. It can be easily removed for cleaning.

Tapping:

Tap gently to remove excess solder.

Wiping:

Use the slots to remove remaining particles.

Optional

Inox wool
Ref. CL6205

Brushes
Ref. CL6220

Tip-tinner
Ref. TT-A

Sand
Ref. CL6211

Changing cartridges

Save time and change cartridges safely without switching the station off.

1. Removing

Place the handle in the extractor and pull to remove the cartridge.

2. Inserting

Place the handle on top of the new cartridge and press down slightly.

3. Fixing

Use the holes for fixing the cartridge* as follows:
A. For straight C210.
B. For curved C210.
C. For curved C245.
D. For straight C245.

*Important

It is essential to insert the cartridges as far as the mark for a proper connection.

Compatible cartridges

The DIT-D works with T245/T470 handles and C245 cartridges or with T210 handles and C210 cartridges. Find the model that best suits your soldering needs in www.jbctools.com

Round

Chisel

Round bent

Bevel

Special models

Compatible Handles

For general use

Work with C245 Cartridge range.

General Purpose Handle

Ref. T245-A

Blue General Purpose Handle

Ref. T245-PA

Non-slip Handle

Ref. T245-B

Soft Thermal Insulator Handle

Ref. T245-C

Note: All models are supplied with a 1.5m cable.

Operation

The JBC Exclusive Heating System

Our revolutionary technology is able to recover tip temperature extremely quickly. It means the user can work at a lower temperature and improve the quality of soldering. The tip temperature is further reduced thanks to the Sleep and Hibernation modes which increase the tip life by 5.

1. Work

When the tool is lifted from the stand the tip will heat up to the selected temperature.

2. Sleep

When the tool is in the stand, the temperature reduces to 180°C / 360°F (preset sleep temperature).

3. Hibernation

After longer periods of inactivity (pre-set to 30 min.), the power is cut and the tool cools down to room temperature.

- Change temperature (from 90 to 450°C)
- Select temperature levels
- Fix one temperature

- Change Sleep temperature
- Set Sleep delay (from 0 to 9 min or no Sleep)

- Set Hibernation delay (from 0 to 60 min or no hibernation)

Process Control

Work Screen

Displays a specific fixed temp.

Shown once you have selected temp. levels.

The work screen provides useful information of tool status in real time.

Menu Screen

Original PIN: 0105

Maintenance

Before carrying out maintenance or storage, always allow the equipment to cool and unplug the stand from the station and the tool.

- Clean the station screen with a glass cleaner or a damp cloth.
- Use a damp cloth to clean the casing, the stand and the tool. Alcohol can only be used for cleaning the metal parts.
- Periodically check that the metal parts of the tool and stand are clean so that the station can detect when the tool is in the stand.
- Maintain tip surface clean and tinned prior to storage in order to avoid tip oxidation. Rusty and dirty surfaces reduce heat transfer to the solder joint.
- Periodically check all cable connections.
- Replace a blown fuse as follows:

Clean periodically

1. Remove the fuse by pulling the black cap. If necessary use a tool to lever it off.

2. Press the new fuse into the holder and replace it in the station.

- Replace any defective or damaged pieces. Use original JBC spare parts only.
- Repairs should only be performed by a JBC authorized technical service.

Safety

It is imperative to follow safety guidelines to prevent electric shock, injury, fire or explosion.

- Do not use the equipment for any purpose other than soldering or rework. Incorrect use may cause fire.
- The power cord must be plugged into approved bases. Be sure that it is properly grounded before use. When unplugging it, hold the plug, not the wire.
- Do not work on electrically live parts.
- The tool should be placed in the stand when not in use in order to activate the sleep mode. The soldering tip, the metal part of the tool and the stand may still be hot even when the station is turned off. Handle with care, including when adjusting the stand position.
- Do not leave the appliance unattended when it is on.
- Do not cover the ventilation grills.
- Heat can cause inflammable products to ignite.
- Use a "non residue" classified flux and avoid contact with skin or eyes to prevent irritation.
- Be careful with the fumes produced when soldering.
- Keep your workplace clean and tidy. Wear appropriate protection glasses and gloves when working to avoid personal harm.
- Utmost care must be taken with liquid tin waste which can cause burns.
- This appliance can be used by children over the age of eight and also persons with reduced physical, sensory or mental capabilities or lack of experience provided that they have been given adequate supervision or instruction concerning use of the appliance and understand the hazards involved. Children must not play with the appliance.
- Maintenance shall not be carried out by children unless supervised.

Specifications

Premium Soldering station DIT-1D/ DIT-2D/ DIT-9D

- Total weight: 4.4 kg (9.6 lb)

DI-1D 120V 50/60Hz. Input fuse: 2A. Output: 23.5V.

DI-2D 230V 50/60Hz. Input fuse: 1A. Output: 23.5V.

DI-9D 100V 50/60Hz. Input fuse: 2.5A. Output: 23.5V.

- Weight: 2.2 kg (9.6 lb)

- Dimensions: 90 x 105 x 180 mm

- Temperature Range: from 90°C (190°F) to 450°C (840°F)

- Idle Temp. Stability (still air): ±1.5 °C / ±3 °F

- Output Peak Power: 130W

- Tip to ground resistance: <2 ohms

- Tip to ground voltage: <2mV RMS

- Ambient operating temp: 10-40 °C / 50-104 °F

- USB connector station-PC

Complies with CE standards

ESD protected housing "skin effect"

JBC

Warranty

JBC's 2 year warranty covers this equipment against all manufacturing defects, including the replacement of defective parts and labour.

Warranty does not cover product wear due to use or mis-use.

In order for the warranty to be valid, equipment must be returned, postage paid, to the dealer where it was purchased.

This product should not be thrown in the garbage.

In accordance with the European directive 2002/96/EC, electronic equipment at the end of their life must be collected and returned to an authorized recycling facility.
